

Children have to stay at home and not go to school.

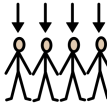

This is because there is a virus called Corona Virus.

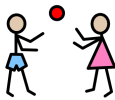

The safest place to be is at home.

The Primeminister has told everyone to stay at home and

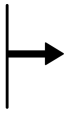

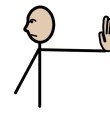

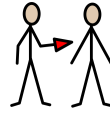

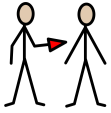

keep washing their hands to keep everybody safe.

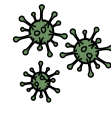

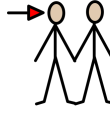

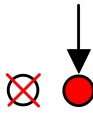

At home you can do some learning, playing and even go out

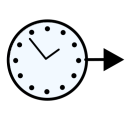

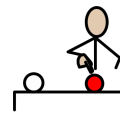

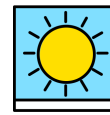

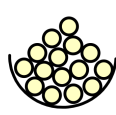

for a walk or cycle.

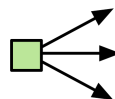

If you go out of the house then you have to stay away from

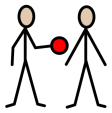

other people, just in case they have the virus.

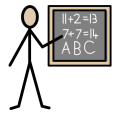

Wash your hands lots of times throughout the day. This will

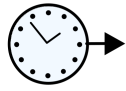

help stop the virus spreading.

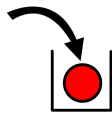

Your

teachers

will

be putting

some

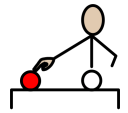

work

online

so

that

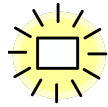

you can

still

learn

new things

at

home.
